Field Care Reminders

(Call Pete Greskoff at 610 256-2201 with questions or issues)

Ongoing:

- Should be at least two hard rakes, two leaf rakes and a drag mat at each field
- After every game or practice – use soft rakes to pull any loose dirt off of the infield grass back on the base paths or pitcher mound – particularly around home plate and at first and third base on Haas, Cappelletti and Robl. On Toscani – please do along first and third base lines
- When raking or dragging dirt covered areas– please make sure to keep infield dirt off of grass. Raking or dragging in direction players run will help
- Do not use lime (white powder) on grass surfaces – only use white paint on grass for foul lines – I hope to do the painting weekly which should be enough
- Notify Pete if any supplies are running short
- No batting practice pitching on grass – must remain on mound to pitch or use cages
- Do not use bricks or other foreign objects in batting cages

Early Season Care (Due to severe winter)

- Please try to avoid concentrated activities on grass – (i.e. – practice base running on dirt – not grass, hit infield outfield from dirt, not grass)
- Special attention should be paid to base paths on grass base path fields
- Try to avoid newly sodded areas at all times
- Grass stressed behind home plate on Toscani – please avoid if you can

Thanks to all for your help and consideration – fields are best in area – let's work to keep it that way.
